

Esco Products, Inc. Introduces
The 3-D BullsEye:
Sight Window Plug Replacement

Esco has developed a new product to make the job of a lubrication technician or maintenance manager easier. **The standard sight windows on oil reservoirs make it difficult to view the oil level, stain easily, and must be replaced often.** Our team at Esco decided to improve upon this product and have created a replacement sight window plug called the **3-D BullsEye**.

The **3-D BullsEye** is a clear cylinder made from one solid piece of acrylic with threading on one end and a rounded polished end for easier viewing of the oil on the other. NPT sizes of 1/2", 3/4", 1", 1 1/4", 1 1/2" and 2" are available.

Look at the difference between the two photos below! The first image is of a standard sight window through which it nearly impossible to see the oil.

See how easy it is to monitor oil level and quality once the 3-D BullsEye is installed! Just walking by, the lubrication maintenance professional can inspect the reservoir oil.
