

LEVELOCK

THE KEY TO RELIABILITY

Maintain the proper level of oil in your equipment with this self-leveling, constant level oiler.

APPLICATIONS

- Bearing housings
- Gearboxes
- Sleeve bearings
- Pump housings
- Ventilating fans and blowers
- Any application requiring a constant liquid level

BENEFITS

- 360 View of oil quality and level
- Improve machine reliability
- Prevent machine downtime
- Avoid costly repairs

PRODUCT OVERVIEW

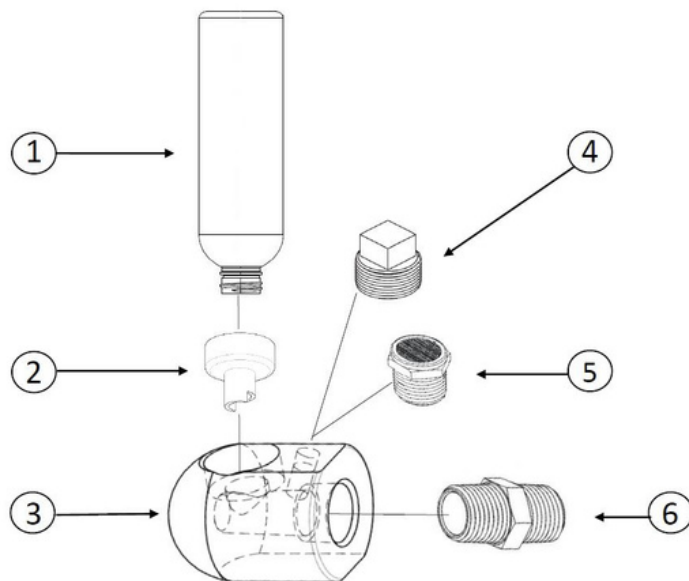

The LevelLock constant level oiler is installed at the sight window that comes standard on most equipment. The 3-D Viewport allows for immediate visual indication of lubricant level and when the lubrication falls below the desired oil level, the reserve reservoir bottle on top self-levels, refilling the reservoir to its appropriate level. Machines often fail due to too little or too much lubricant – the LevelLock locks your oil level in place and provides you and your maintenance team peace of mind.

ESCO PRODUCTS, INC.

LEVELOCK

THE KEY TO RELIABILITY

LEVELOCK KIT - PART NO: ESCOLL750

INCLUDES:

1 - 8oz Natural HDPE Plastic Bullet Bottle, 24mm

2- Esco Levelock Brass Tip
